

The Wagner Meters SMART LOGGER™ is a Bluetooth® low energy temperature and humidity data logger featuring the latest Bluetooth® 4.0 technology and a Nordic NRF51822 chip. It can collect temperature and relative humidity readings from the surrounding environment and record it as historical data. The SMART LOGGER™ can store up to 12,000 temperature and relative humidity (referred to as ‘Humidity’ in the app) measurements. Any smartphone or smart device with Bluetooth® 4.0 or above can download and install the accompanying app to store and monitor the temperature and relative humidity of the environment as conditions change. The SMART LOGGER™ is small, lightweight, portable, and highly accurate for a wide variety of uses within the construction industry, cold chain logistics, archives, labs, museums, and much more.
